TABLE OF CONTENTS

Section 1: Value, Order, and Factors 14
1.1 Numbers and the Number Line 14
1.1.1 The Number Line: Understanding Real Numbers 14
What Are Real Numbers? 14
Key Concepts 14
How Does the Number Line Work? 14
1.1.2 Absolute Value 15
What Is Absolute Value? 15
1.1.3 Triangle Inequality 16
Triangle Inequality Theorem 16
1.1.4 Summary of Key Rules and Formulas 17
1) Absolute Value Definition 17
2) Triangle Inequality Theorem 17
1.2 Factors, Multiples, Divisibility, and Remainders 18
1.2.1 Integers and Consecutive Integers 18
1.2.2 Factors and Multiples 18
Factors 18
Multiples 18
Prime Numbers 18
GCD (Greatest Common Divisor) 18
LCM (Least Common Multiple) 19
1.2.3 Division, Quotient, and Remainder 19
1.2.4 Even and Odd Integers 20
1.2.5 Prime and Composite Numbers 20
1.2.6 Summary of Key Rules and Formulas 22
1) Integers and Consecutive Integers 22
Definition of Integers 22
Consecutive Integers 22
2) Factors and Multiples 22
Definition of Factors 22
Definition of Multiples 22
GCD (Greatest Common Divisor) 22
LCM (Least Common Multiple) 22
3) Division Equation 22
4) Even and Odd Integers 23
Even Numbers 23
Odd Numbers 23
Key Properties of Even and Odd Numbers 23
5) Prime and Composite Numbers 23
Prime Numbers 23
Composite Numbers 23

Prime Factorization 23
1.3 Exponents 24
1.3.1 Exponents 24
1.3.2 Negative Exponents 24
1.3.3 Fractional (Rational) Exponents 24
How It Works 25
1.3.4 Square Roots and Cube Roots 25
Square Roots 25
Cube Roots 26
1.3.5 Basic Exponent Rules 26
1.3.6 Imaginary Numbers 27
Definition of the Imaginary Unit i 27
1.3.7 Summary of Key Rules and Formulas 28
1) Exponentiation Definition 28
2) Special Exponents 28
Squaring a Number 28
Cubing a Number 28
Negative Exponent Rule 28
Fractional Exponent Rule 28
3) Square and Cube Roots 28
The Definition of a Square Root 28
The Definition of a Cube Root 28
Absolute Value Relationship 29
4) Basic Exponent Rules 29
5) Imaginary Numbers 29
Definition of the Imaginary Unit i 29
1.4 Decimals and Place Values 30
1.4.1 Decimal Representation 30
1.4.1.1 Understanding Decimals 30
Definition 30
How it works 30
1.4.1.2 Place Values in Decimals 30
1.4.2 Scientific Notation 31
Definition 31
Conversion Rules 31
1.4.3 Basic Operations with Decimals 32
1.4.3.1 Adding and Subtracting Decimals 32
1.4.3.2 Multiplying Decimals 33
1.4.3.3 Dividing Decimals 33
1.4.4 Summary of Key Rules and Formulas 35
1) Scientific Notation 35
2) Conversion Rule 35
3) Steps for Adding and Subtracting Decimals 35
4) Steps for Multiplying Decimals 35

5) Steps for Dividing Decimals 36
1.5 Properties of Operation 37
1.5.1 Commutative Property 37
Addition 37
Multiplication 37
1.5.2 Associative Property 37
Addition 37
Multiplication 38
1.5.3 Distributive Property 38
Over Addition 38
Over Subtraction 38
1.5.4 Identity Property 38
Addition Identity 38
Multiplication Identity 39
1.5.5 Zero Property of Multiplication 39
Multiplication 39
1.5.6 Inverse Property 39
Additive Inverse 39
Multiplicative Inverse 39
1.5.7 Sign Rules for Multiplication 40
1.5.8 Other Properties 40
Symmetric Property 40
Transitive Property 40
Reflexive Property 41
Substitution Property 41
1.5.9 Exponentiation 41
1.5.10 Summary of Key Rules and Formulas 42
Properties of Arithmetic Operations 42
1) Commutative Property 42
2) Associative Property 42
3) Distributive Property 42
4) Identity Property 42
5) Zero Property of Multiplication 42
6) Inverse Property 42
7) Symmetric Property 42
8) Transitive Property 42
9) Reflexive Property 42
10) Substitution Property 43
2.1 Algebraic Expressions and Equations 44
2.1.1 Algebraic Expressions 44
2.1.2 Translating Words into Algebraic Expressions 45
2.1.3 Terms and Polynomials 45
2.1.4 Simplifying Expressions 46
2.1.5 Fractions in Algebra 46

2.1.6 Multiplying Algebraic Expressions 47
2.1.7 Evaluating Expressions 47
2.1.8 Algebraic Equations 47
2.1.9 Summary of Key Rules and Formulas 48
1) Algebraic Expression 48
2) Polynomials 48
3) Fractions in Algebra 48
4) Multiplying Algebraic Expressions 49
2.2 Linear Equations 50
2.2.1 Standard Form of a Linear Equation 50
2.2.2 Linear Equations with One Unknown 50
2.2.3 Solving Linear Equations with One Unknown 50
2.2.4 Linear Equations with Two Unknowns 51
2.2.5 Methods to Solve Two Linear Equations with Two Unknowns 51
Substitution Method 51
Elimination Method 52
2.2.6 Summary of Key Rules and Formulas 54
1) Linear Equation with One Unknown 54
2) Solving a Linear Equation with One Unknown 54
3) Linear Equation with Two Unknowns 54
4) Solving a System of Linear Equations 54
2.3 Factoring and Quadratic Equations 55
2.3.1 What is Factoring? 55
2.3.2 Factoring to Solve Equations 55
Solving Polynomial Equations by Factoring 55
Solving Rational Equations by Factoring 56
2.3.3 Types of Quadratic Factoring 56
Difference of Squares 57
Perfect Square Trinomial 57
2.3.4 Solving Quadratic Equations by Factoring 57
2.3.5 Quadratic Formula 58
2.3.6 Summary of Key Rules and Formulas 60
1) Solving Rational Equations by Factoring 60
2) Standard Form of a Quadratic Equation 60
Common Factoring Patterns For Quadratic Equations 60
3) Quadratic Formula 60
4) Perfect Square Trinomial 60
5) Difference of Squares 60
2.4 Inequalities 61
2.4.1 Introduction to Inequalities 61
2.4.2 Types of Inequalities 61
Linear Inequality 61
Quadratic Inequality 61
Compound Inequality 61

2.4.3 Solving Linear Inequalities 62
2.4.4 Summary of Key Rules and Formulas 63
1) Inequality Types 63
2) Solving Linear Inequalities 63
2.5 Functions 65
2.5.1 What is a Function? 65
2.5.2 Types of Functions 65
Linear Function 65
Quadratic Function 65
Polynomial Function 66
2.5.3 How to Evaluate a Function 66
2.5.4 Summary of Key Rules and Formulas 67
1) General Form of a Function 67
2) General Form of a Linear Function 67
3) General Form of a Quadratic Function 67
4) General Form of a Polynomial Function 67
2.6 Graphing 68
2.6.1 The Basics of Graphing 68
The Coordinate Plane 68
2.6.2 Plotting Points 69
2.6.3 Linear Equations and Graphing Lines 69
Graphing Linear Equations 69
Intercepts 72
Linear Intersections 73
Finding the Slope between two points 74
2.6.4 Graphing Functions 75
How to Graph a Function 75
2.6.7 Summary of Key Rules and Formulas 77
1) Equation of a Line (Slope-Intercept Form) 77
2) Slope Calculation 77
3) x-Intercept of a Linear Equation 78
4) y-Intercept of a Linear Equation 78
2.7 Formulas and Measurement Conversion 79
2.7.1 What is a Formula? 79
2.7.2 Measurement Conversion as a Formula 79
2.7.3 Unit Conversions 79
Section 3: Rates, Ratios, and Percents 81
3.1 Ratio and Proportion 81
3.1.1 What is a Ratio? 81
Notation 81
3.1.2 What is a Proportion? 81
Notation 81
Cross Multiplication Property of Proportions 81
3.1.3 The Unitary Method 82

3.1.4 Summary of Key Rules and Formulas 83
1) Ratio Definition 83
2) Proportion Definition 83
3) Cross Multiplication in Proportions 83
4) Finding an Unknown in a Proportion 83
3.2 Fractions 84
3.2.1 Understanding Fractions 84
Types of Fractions 84
3.2.2 Simplifying Fractions 85
3.2.3 Converting Between Mixed Numbers and Improper Fractions 85
Mixed to Improper Fraction 85
Improper to Mixed 86
3.2.4 Adding and Subtracting Fractions 86
Same Denominator 86
Different Denominators 87
3.2.5 Multiplying Fractions 87
3.2.6 Dividing Fractions 88
3.2.7 Summary of Key Rules and Formulas 89
1) Definition of Fraction 89
2) Simplifying Fractions 89
3) Addition and Subtraction 89
4) Multiplication 89
5) Division 89
3.3 Percents 90
3.3.1 What is a Percent? 90
3.3.2 Key Percent Formulas 90
Percent Formula 90
Finding the Part 90
3.3.3 Types of Percent Problems 91
Basic Percent Problems 91
Percent Increase and Decrease 91
Percent Change Between Two Numbers 92
Discounts 92
3.3.4 Summary of Key Rules and Formulas 94
1) General Percent Formula 94
2) Percentage of a Number 94
3) Percent Increase Formula 94
4) Percent Decrease Formula 94
5) Percent Change Formula 94
6) Percent of a Percent 94
7) Discount Formula (for calculating price after discount) 94
3.4 Converting Decimals, Fractions, and Percents 96
3.4.1 Converting Percents to Fractions 96
3.4.2 Decimal as a Sum of Fractions 96

3.4.3 Summary of Key Rules and Formulas 98
1) Percent to Fraction Conversion 98
2) Decimals as Sums of Fractions 98
3.5 Working with Decimals, Fractions, and Percents 99
3.5.1 Gross Profit 99
3.5.2 Simple Annual Interest 100
3.5.3 Compound Interest 100
3.5.4 Using Tables to Solve Percentage and Fraction Word Problems 101
3.5.5 Summary of Key Rules and Formulas 103
1) Gross Profit 103
2) Gross Profit Percentage (based on selling price) 103
3) Simple Interest (Annual) 103
4) Simple Amount (Annual) 103
5) Compound Amount (Annual) 103
6) Compound Interest (Annual) 103
3.6 Rate, Work, and Mixture Problems 105
3.6.1 Rate Problems 105
Understanding Rate 105
Key Formulas 105
3.6.2 Work Problems 106
Understanding Work Rates 106
Key Formulas 106
3.6.3 Mixture Problems 107
Understanding Mixtures 107
Key Formulas 107
3.6.4 Summary of Key Rules and Formulas 109
Distance, Rate, and Time 109
1) Distance 109
2) Rate (or speed) 109
3) Time 109
Work Problems 109
4) Work 109
5) Time to Complete Work 109
6) Rate 109
7) Combined Work (working together) 109
Mixture Problems 110
8) Total Value 110
9) Final Concentration (or weighted average) 110
Section 4: Statistics, Sets, Counting, Probability, Estimation and Series 111
4.1 Statistics 111
4.1.1 Average (Mean) 111
4.1.2 Median 111
How It Works 112
4.1.3 Mode 112

4.1.4 Range 112
4.1.5 Standard Deviation 113
What Does It Mean? 113
How Is Standard Deviation Calculated? 113
4.1.6 Frequency and Frequency Distribution 115
What Is Frequency? 115
What Is Frequency Distribution? 115
Frequency Distribution Table 115
4.1.7 Summary of Key Rules and Formulas 116
1) Average (Mean) 116
2) Median 116
3) Mode 116
4) Range 116
5) Steps to Calculate Standard Deviation 116
6) Frequency 117
4.2 Sets 118
4.2.1 Introduction to Sets 118
4.2.2 Number of Elements in a Set 118
4.2.3 Universal Set (U) 118
4.2.4 Subset 119
4.2.5 Set Operations 119
Intersection ($A \cap B$) 119
Union ($A \cup B$) 119
4.2.6 Counting Elements in Unions 119
Union of Two Sets 120
4.2.7 Venn Diagrams 120
4.2.8 Summary of Key Rules and Formulas 122
1) Set Notation 122
2) Cardinality ($|A|$) 122
3) Universal Set (U) 122
4) Subset 122
5) Set Operations 122
6) Counting Elements in Unions 122
4.3 Counting Methods 123
4.3.1 What Are Counting Methods? 123
4.3.2 Multiplication Principle: The Foundation of Counting 123
4.3.3 Factorials: The Cornerstone of Counting 124
4.3.4 Combinations: When Order Doesn't Matter 124
Symmetry Identity 125
4.3.5 Permutations: When Order Matters 125
4.3.7 Summary of Key Rules and Formulas 126
1) Multiplication Principle 126
2) Factorials 126
3) Combinations 126

4) Permutations 126
4.4 Probability 127
4.4.1 What is Probability? 127
4.4.2 Types of Probability Events 128
4.4.2.1 Independent Events 128
4.4.2.2 Dependent Events 128
4.4.2.3 Mutually Exclusive Events 129
4.4.2.4 Non-Mutually Exclusive Events 130
4.4.3 Probability Rules and Theorems 131
4.4.3.1 The Addition Rule 131
4.4.3.2 The Multiplication Rule 131
4.4.3.3 Complement Rule 132
4.4.4 Conditional Probability 132
4.4.7 Summary of Key Rules and Formulas 134
1) Probability Formula 134
2) Independent Events 134
3) Dependent Events 134
4) Mutually Exclusive Events 134
5) Non-Mutually Exclusive Events 134
6) Addition Rule 135
7) Multiplication Rule 135
8) Complement Rule 135
9) Conditional Probability 135
4.5 Estimation 137
4.5.1 Rounding to Place Values 137
How to Round a Number to the Nearest Place Value 137
4.5.2 Rounding to Compatible Numbers 138
How to Use Compatible Numbers 138
4.5.3 Rounding to Powers of Numbers 138
How to Use Powers of Numbers 138
4.5.4 Range Estimation 139
How to Use Range Estimation 139
4.5.5 Summary of Key Rules and Formulas 141
1) Rounding to Place Values 141
2) Rounding to Compatible Numbers 141
3) Rounding to Powers of Numbers 141
4) Range Estimation 141
4.6 Sequences and Series 143
4.6.1 Sequence 143
4.6.2 Series 143
4.6.3 Arithmetic Sequences and Series 144
4.6.3.1 Arithmetic Sequence 144
4.6.3.2 Sum of an Arithmetic Sequence 145
4.6.4 Summary of Key Rules and Formulas 146

1) General Term of an Arithmetic Sequence 146
2) Sum of an Arithmetic Series (Sequence) 146
